

# PA-600

## 2 Channel Professional Amplifier

Model:  
PA-600

PA-600

(H) Height	3-1/2"
(W) Width	19"
(D) Depth	15-7/16"

### OBJECTIVE

Ultra sensitive input pre-amp stage circuitry. Most products on the market cannot produce enough voltage to drive an amp. Earthquake increased sensitivity by giving you more output with less input signal. This new circuitry will allow you to drive the amp to full stage with as little as 60milivolt.

The new auto sensing circuitry immediately senses signal as it reaches the amplifier, when the music stops it will automatically fall asleep. While in sleep mode the PA-600 consumes less energy than commonly sold Pro Amps.

### INTENDED USE

- ✓ Contractors, Custom Installers & Retailers
- ✓ Home Theater & 2-Channel Music Systems
- ✓ Marine and RV Compatible
- ✓ Subwoofer Compatible

### SPECIAL FEATURES & HIGHLIGHTS

- 600-watt rack mountable, 2-channel bridgeable amplifier
- Auto sensing
- Rack mountable
- Operation status LEDs
- XLR, RCA and 1/4" phone (tip/ring/sleeve)
- Variable speed air fan cooling rear intake, top exhaust

### SPECIFICATIONS

**PA-600**

Power Handling	<ul style="list-style-type: none"> <li>• 2 x 120 watts RMS @ 8ohm 20Hz-20kHz (stereo mode)</li> <li>• 2 x 200 watts RMS @ 4ohm 20Hz-20kHz (stereo mode)</li> <li>• 600 watts RMS @ 4ohm bridged</li> </ul>
Frequency Response	20Hz-20kHz, 0.01dB
Total Harmonic Distortion	<0.05%, 20Hz-20kHz
Finish	Black
<b>MSRP</b>	€480/pc
