Sound That Will Move You

Telesto

Titan Tower Series

Titan Telesto Towers

(H) Height	50-1/2"
(W) Width	7-3/4"
(D) Depth	15-7/8"

Model:
Titan Telesto

OBJECTIVE

The Telestos' sleek, slim exteriors are matched only by their performance. The main Telesto cabinets are built from multi-laminations of steam bent, high density fiber board. These laminations offer extreme rigidity as well as lower cabinet vibrations. These single pieces of egg shaped walls offer minimum wall reflections and allow the cabinets to be transparent, dynamic, and neutral.

The design of the T1 tweeter module on top of the cabinet in a separate enclosure achieves perfect positioning for wider dispersion and better image stability. The T1 is tuned to allow correct phase integration with M2, the midrange driver. The enclosure designs are optimized to deliver the ultimate in sound quality. Each Telesto is voice tuned to deliver a transparent performance.

As AV front speakers or a conventional stereo system, the Telestos will deliver a benchmark in performance and style that is unprecedented.

INTENDED USE

- ✓ Contractors, Custom Installers & Retailers
- ✓ Home Theater & 2-Channel Music Systems
- ✓ Recording Studio

SPECIAL FEATURES & HIGHLIGHTS

- 1" silk dome super tweeters
- 1.25" silk dome compression tweeters
- Dual 4" Kevlar midranges
- 8" fiberglass cone side woofer
- High power handling
- Gold plated binding posts
- Fine high gloss 3mm black laquer paint finish

SPECIFICATIONS

Titan Telesto Towers

Frequency	25Hz-40KHz
Sensitivity	88dB+/-3dB
Nominal Impedance	4 Ohms
Crossover frequency	350Hz, 3.2KHz, 10KHz
Rec. amplifier power	100WRMS and up to 500WRMS
Net weight (ea. speaker)	68 lbs/31kgs
Available finish	Piano Black
MSRP (per pair)	€4.500
